

SCOTT REUTER LTD

Welcome to the brochure of Scott Reuter Ltd. We are a company based in Edinburgh who specialise in manufacturing and installing a wide range of joinery and upholstery.

SCOTT REUTER LTD

About Us

Formed in 1988, Scott Reuter Ltd. started up as a joinery firm specialising in marine joinery to capitalise on what, at the time, was a flourishing ship repair industry in Scotland. Scott Reuter Ltd. built a reputation for producing high quality work for an incredibly diverse range of clients from fishery protection vessels, to the Royal Yacht Britannia.

With the demise in ship repair in recent years the company diversified away from solely marine joinery towards being a joinery sub-contractor for general shop-fitting, which in turn led to upholstery. A highly skilled team of upholsterers was added to the workforce in response to an increased demand for bespoke, handmade, fixed seating in the bars and restaurants that Scott Reuter's Ltd. joiners were involved with refurbishing. Today our upholstery can be found as far away as central London restaurants and in some of Scotland's finest bars.

In conjunction with our upholstered seating we also offer joinery services in both marine and land based contracts. Our talented joiners work on a wide variety of contracts turning out anything from high quality furniture for ships cabins to custom made garage doors.

As a company we are proud of the quality of both the product and the service that we supply to our clients. Still operating from Edinburgh, and now under new management, Scott Reuter Ltd. offer a cost effective, efficient and friendly service to a wide variety of clients.

SCOTT REUTER LTD

SERVICES

Upholstery

At Scott Reuter Ltd. we build and install fixed seating for a range of different shopfitters and interior designers. When necessary our experienced team can provide advice and feedback to the interior designers on the practical aspect of making their vision become a reality. The vast majority of our work is done in our Leith workshop, with the handmade units transported to site and fitted in a tidy manner, keeping costs and disruption to a minimum.

Supplying a service to domestic customers for reupholstering suites and furniture is a growing area of our business. Clients have found that they can rejuvenate their homes without having to rearrange the layout of their rooms by simply recovering their existing seating. This is not only cheaper than buying a new suite, it also means that a much loved suite can be recovered in any fabric. We can supply a wide range of appropriate materials, but can also work with material supplied by the client, which we can have treated in order to make it fire retardant if necessary.

A repair service for damaged seating is also available with many repairs carried out on site at a time convenient to our client.

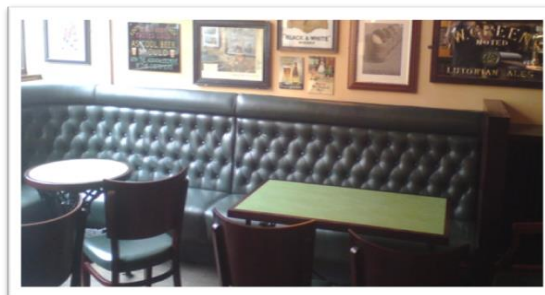

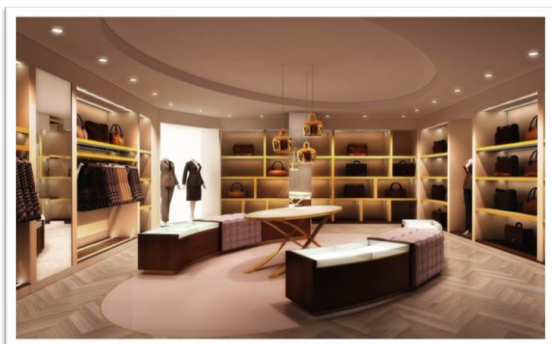

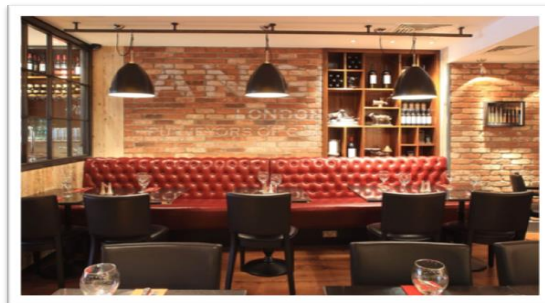

SCOTT REUTER LTD

SCOTT REUTER LTD

Commercial Joinery

Marine Joinery

Scott Reuter Ltd. offers a specialised service for all areas of marine joinery. Based in Leith Docks we are ideally situated for boats using the port, however we are also able to provide an international service to our clients.

Our company specialises in the joinery aspect of mobilising and demobilising subsea construction and offshore support vessels. Fitting and replacing deck timbers and crash barriers, infilling of trip hazards and general joinery are all services provided by Scott Reuter Ltd. to ships which require being mobilised in short time frames. By working closely with the owners, project managers and other trades, Scott Reuter Ltd. help to ensure that each vessel has a swift turnaround period.

We currently work for the following clients:

- Technip UK Ltd. – Leith, Le Trait (France), Aberdeen, Peterhead
- Bibby Offshore Ltd. – Leith, Dundee

Maintenance

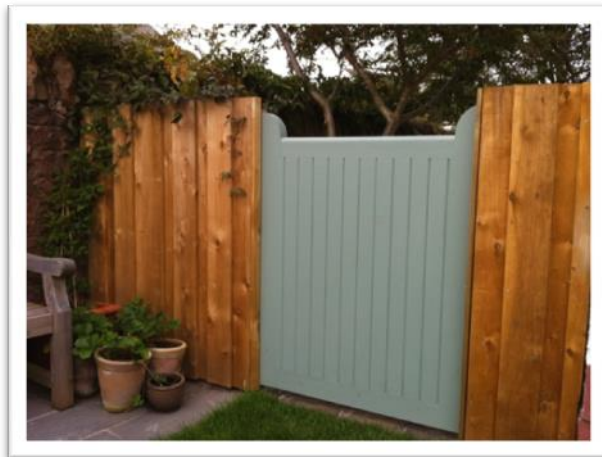

We also offer a full maintenance service to a variety of clients including pub chains, commercial offices and healthcare facilities. All trades can be provided by using fully accredited sub-contractors with projects varying in size and duration. Examples of recent maintenance projects carried out by Scott Reuter Ltd.

- Full refurbishment of pub toilets including renewing plumbing, installing multipanel wall covering, reinstating lights and ventilation and new floor coverings.
- Extend existing 'nursing stations' in a hospital ward, to include new entrance gates.
- Supply and fit new fire doors to health centre.
- French polishing to hotel reception area and entrance banister.
- Refurbish sash and case windows.
- Emergency call outs for plumbing.
- Boarding up windows of closed premises.
- Stud wall partitions built into offices.
